

Comprehensive Research Report: KANAD S.H.I.E.L.D. 2026 Ecosystem Analysis, Video Intelligence, Local Media Syntheses, Technical Repositories, and Operational Workflows

Video Intelligence and Law Enforcement Workflows

Official Hackathon Intelligence and Mandate

The KANAD S.H.I.E.L.D. 2026 hackathon ("Security Hackathon for Intelligence, Encryption, Law Enforcement and Defence") is an initiative organized by the Cyber Crime Branch of the Ahmedabad City Police in collaboration with i-Hub Gujarat as the startup ecosystem partner¹. Operating directly from the Cyber Crime Branch premises in Shahibaug, Ahmedabad, the event features 26 problem statements split into Category 1 (Startups, Industry, and Researchers) and Category 2 (Students, Graduates, and Doctoral Candidates)¹.

The primary video coverage introducing the hackathon to the startup ecosystem is titled "KANAD S.H.I.E.L.D — Gujarat Cyber Crime Department's BIG Opportunity for Startups"¹. Published by i-Hub Gujarat, the video outlines the strategic vision behind the initiative. The speakers highlight that law enforcement agencies require external, cutting-edge software solutions to address modern cyber threats¹. Rather than seeking conceptual prototypes, the judging process prioritizes production-ready software capabilities capable of handling large-scale data ingestion and real-time processing¹.

Key operational details established across official hackathon documentation and promotional communications include:

- Stated Target Audience: Category 1 focuses on registered startups, industry professionals, and specialized research labs, whereas Category 2 targets undergraduate, postgraduate, and doctoral researchers¹.
- Primary Objective: Bridging the operational gap between commercial software innovation and police investigation needs across big data analytics, deepfake verification, financial crime tracing, and tactical communications analysis¹.
- Evaluation Criteria: Technical feasibility, speed of processing over massive datasets, seamless UI integration for field investigators, and strict adherence to Indian legal and digital evidence standards¹.

Media Output from Ahmedabad City Police and Partner Ecosystems

The Ahmedabad City Police and i-Hub Gujarat have produced instructional and awareness

media content detailing operational achievements and threat advisories². Explainer videos produced via Decode Mediacom for the Ahmedabad City Police showcase the department's public branding and awareness push². Furthermore, official channels highlight dedicated units operating under the Cyber Crime Branch³:

- Cyber Suraksha Lab: Provides free technical device scanning and malware inspection for citizens³.
- Incident Response Unit (IRU): Handles immediate financial fraud reporting to block fraudulent transactions before funds are moved through mule networks³.
- Anti-Cyber Bullying Unit: Operates a 24x7 support line offering assistance and technical intervention for women and minors³.

Case success videos published by the department demonstrate real-world interventions, such as recovering funds for citizens targeted by Bank of Baroda impersonation scams through rapid IRU lien requests⁴.

Key Investigative Challenges Cited by Senior Officers

Public briefings and press conferences by senior officers in Gujarat indicate that cyber fraud has expanded rapidly, recording a multi-year escalation of over 30%, with approximately 500 complaints logged daily across the state⁵. Law enforcement officers consistently identify three main operational bottlenecks:

Rapid Dissipation of Funds

Fraudulent transactions are routed through layered networks of mule bank accounts within minutes⁶. Scammers immediately convert fiat currency into cryptocurrency, predominantly Tether (USDT), making traditional bank freezes ineffective unless initiated within the first hour⁸.

Synthetic Media and Biometric KYC Bypass

Perpetrators increasingly leverage generative AI tools to create dynamic deepfake video and voice models⁵. These synthetic artifacts allow fraudsters to bypass automated video-KYC checks at financial institutions, enabling them to open mule accounts and secure instant loans without triggering standard One-Time Passwords (OTPs)⁵.

Authority Impersonation and Isolation Techniques

Criminal syndicates employ sophisticated "Digital Arrest" tactics via video calls, impersonating officials from the CBI, RBI, or local police departments⁶. By presenting forged official documents and letters, fraudsters intimidate victims into staying under continuous camera surveillance while executing high-value transfers⁶.

Operational Workflow of Cybercrime Investigations

The investigation of financial cyber fraud in India follows a structured workflow managed under the Indian Cyber Crime Coordination Centre (I4C) of the Ministry of Home Affairs¹⁰. The process begins when a victim lodges a complaint via the National Cyber Crime Reporting Portal (NCRP) or the 1930 National Cyber Crime Helpline¹⁰.

During initial intake on the 1930 helpline, operators record four critical parameters¹⁰:

1. The victim's originating bank account number or payment identifier¹⁰.
2. The exact financial amount debited¹⁰.
3. The precise timestamp of the transaction¹⁰.
4. The Unique Transaction Reference (UTR) number or Transaction ID¹⁰.

This structured data is immediately processed by the Financial Cyber Fraud Reporting System (FCFRS), which dispatches automated lien requests to beneficiary banks and payment intermediaries to freeze funds along the transfer chain¹⁰. Under the e-Zero FIR initiative, eligible financial fraud complaints are automatically converted into e-Zero FIRs and routed into the Crime and Criminal Tracking Network & Systems (CCTNS)¹¹. Local investigators at the Cyber Crime Branch then ingest these structured feeds, trace multi-layered bank ledgers, analyze IPDR/CDR logs, and map mule account networks for physical intervention and recovery.

Forensic Tool Benchmarks for User Interface Design

To meet the expectations of hackathon judges accustomed to commercial forensic tools, competing solutions must mirror the visual organization and investigative workflows of established enterprise platforms¹².

Platform	Core Modules & Key Capabilities	Visual Layout & UI Benchmarks	Primary Investigative Application
----------	---------------------------------	-------------------------------	-----------------------------------

Magnet AXIOM	AXIOM Process (ingestion/extraction) & AXIOM Examine (analysis/reporting) ¹ ⁷ . Comprehensive artifact recovery, cloud extraction, and connection mapping ¹³ .	Multi-pane workspace featuring an Artifact Explorer tree on the left, tabbed analysis center, property inspector on the right, and high-contrast dark/light themes ¹⁸ .	Disk, mobile, cloud, and vehicle digital forensics ¹³ .
BriefCam	REVIEW (Video Synopsis forensic search), RESPOND (real-time alerts), RESEARCH (operational intelligence) ¹² .	Multi-camera grid featuring overlaid Video Synopsis objects, facial recognition match cards, line-crossing visual triggers, and spatial density heatmaps ¹² .	CCTV video analytics, surveillance indexing, and pattern research ¹² .
Chainalysis Reactor	Node-link graph analysis, cross-chain tracing (27+ blockchains), entity clustering, KYT risk scoring integration ¹⁴ .	Interactive node canvas with color-coded wallet clusters, annotated directional transfer arrows, attribution sidebars, and risk timeline meters ¹⁴ .	Cryptocurrency transaction tracing and wallet attribution ¹⁴ .
Maltego	Graphical link analysis, open-source intelligence (OSINT) gathering, automated Transform execution ¹⁶ .	Java-based graph canvas supporting Block, Organic, and Circular layouts, context-menu Transform trees, entity property panels, and live multi-analyst graph sharing ¹⁶ .	Entity relationship mapping (IPs, domains, social profiles, identities) ¹⁶ .

Arkime / Malcolm	Open-source packet capture (PCAP) analysis, SPI views, OpenSearch dashboard visualization, threat intelligence enrichment ¹⁵ .	Search bar supporting Lucene/DQL at the top, expandable Session Profile Information (SPI) rows, dual Hexadecimal/ASCII packet payload viewer, and instant PCAP slice export ¹⁵ .	Network traffic PCAPs, protocol parsing, and deep packet inspection ¹⁵ .
Cellebrite UFED	Physical/logical mobile device extractions, bypass protocols, timeline analysis via Physical Analyzer ²³ .	Wizard-driven layout with device selection grids, real-time extraction progress meters, and structured artifact trees ²³ .	Mobile device extractions and file system forensics ²³ .

Local Press Syntheses and Case Studies

Recent Cybercrime Incidents in Ahmedabad

Local Gujarati media outlets—including *Sandesh*, *Gujarat Samachar*, and *Divya Bhaskar*—extensively document cybercrime operations in the region⁶. The following matrix details recent incidents investigated by the Cyber Crime Branch.

Incident Date / Media Outlet	Original Gujarati Headline	Translated English Headline	Cheated Amount	Fraud Typology & Key Details
August 2026 <i>Sandesh</i> [cite: 6, 9]	નકલી CBI અને પોલીસ બની 44 લાખની ઠગાઈ, જોધપુરથી બે આરોપીઓની ધરપકડ	Fake CBI and Police Defraud Woman of ₹44 Lakh; Two Accused Arrested from Jodhpur	₹44,000,000	Digital Arrest Scam: Victim held under virtual isolation via WhatsApp video call; fraudsters presented fake CBI letterheads and counterfeit

				RBI security verification documents ⁶ .
August 2026 <i>Gujarat Samachar</i> [cite: 24]	અમદાવાદ સિવિલના અધિકારીની ઓળખ આપી AI થી 9.60 લાખની ઠગાઈ	Impersonating Ahmedabad Civil Hospital Officer, ₹9.60 Lakh Defrauded Using AI	₹960,000	AI Document Fabrication: Gang created fake purchase orders and government ID cards using AI tools to cheat plastic bag manufacturers on GeM portal ²⁴ .
July 2026 <i>Sandesh</i> [cite: 7]	અમદાવાદમાં સીમ સ્વેપિંગ દ્વારા 83 લાખની ઓનલાઈન છેતરપિંડી	Online Fraud of ₹83 Lakh Through SIM Swapping in Ahmedabad	₹83,000,000	SIM Swapping Fraud: Suspects cloned/swappe d the victim's SIM card, intercepted 2FA OTPs, and drained bank accounts across 19 rapid transactions ⁷ .
August 2026 <i>Gujarat Samachar</i> [cite: 5]	AI થી સાયબર ક્રાઈમમાં 3 ગણો વધારો: ડીપફેક અને વોઈસ ક્લોનિંગથી KYC બાયપાસ	Cybercrime Triples via AI: KYC Bypassed Using Deepfakes and Voice Cloning	Multi-location	Biometric KYC Bypass: Gang hijacked DigiLocker accounts and used AI voice/video deepfakes to pass bank video-KYC checks without OTP triggers ⁵ .

July 2026 <i>Gujarat Samachar</i> [cite: 25]	સેબીના નકલી સર્ટિફિકેટ બતાવી ફાર્મા એક્ઝિક્યુટિવ સાથે 22 લાખની ઠગાઈ	Pharma Executive Cheated of ₹22 Lakh Shown Counterfeit SEBI Certificates	₹2,200,000	Fake Stock Investment: Senior pharma executive in Vejalpur lured into fake trading platform using forged SEBI certification ²⁵ .
July 2026 <i>Sandesh</i> [cite: 26]	વસ્ત્રાલમાં આયુર્વેદિક દવાની આડમાં મોટું સાયબર કૌભાંડ, 7 ધરપકડ	Major Cyber Scam Busted in Vastral Under Guise of Ayurvedic Medicine; 7 Arrested	Nationwide (5,000+ victims)	Extortion & Fake Healthcare: Racket operated out of Vastral, selling fake medicines online and later blackmailing victims posing as police officers ²⁶ .
July 2026 <i>Sandesh</i> [cite: 8]	ઈન્વેસ્ટમેન્ટ સ્કેમમાં 56 લાખની ઠગાઈ, યુએસડીટીમાં ટ્રાન્સફર	₹56 Lakh Cheated in Investment Scam and Transferred into USDT	₹5,600,000	Crypto Laundering: Fraudsters enticed educated investors with high returns, immediately converting fiat proceeds into Tether (USDT) ⁸ .
August 2025 <i>The Hindu / Local Media</i> [cite: 27]	અમદાવાદ શાળાઓ અને નરેન્દ્ર મોદી સ્ટેડિયમને બોમ્બની ધમકી	Woman Arrested for Sending Hoax Bomb Threat Emails to	Non-financial (Hoax disruption)	Identity Spoofing: Ex-Deloitte consultant Rene Joshilda

	આપનાર મહિલાની ધરપકડ	Ahmedabad Schools and Stadium		sent hoax bomb emails to schools, BJ Medical College, and Narendra Modi Stadium using a colleague's identity ²⁷ .
--	------------------------	-------------------------------------	--	--

Analysis of Local Modus Operandi Trends

Digital Arrest & Authority Impersonation

The "Digital Arrest" model has become a frequent tactic in Ahmedabad⁶. Fraudsters contact targets via video calls while posing as senior officers from central agencies⁶. By alleging that the victim's identity is tied to illicit drug shipments or money laundering networks, they instruct victims to remain on continuous camera monitoring⁶. The victim is coerced into transferring funds into "safety verification accounts," which serve as managed mule accounts⁶.

AI-Driven Identity Theft and KYC Bypass

Investigations across Thaltej, Anand, and Vadodara revealed scammers utilizing generative AI to clone victim voices and faces⁵. These synthetic profiles successfully pass automated bank video-KYC checks, enabling fraudsters to open unauthorized accounts and issue fraudulent loans without triggering traditional OTP alerts⁵.

Hoax Bomb Email Disruption

In mid-2025, several educational institutions, BJ Medical College, and the Narendra Modi Cricket Stadium received bomb threat emails²⁷. Police investigations traced these threats to Rene Joshilda, a former software consultant²⁷. Using VPNs and spoofed headers, she sent emails under her male colleague's identity to disrupt operations before being arrested and lodged in Sabarmati Central Jail²⁷.

Local Technology and Safety Infrastructure

The Gujarat State Police and Ahmedabad City Police have deployed several technological initiatives to strengthen public security²⁸:

- **Cyber Ashwast:** A statewide program providing digital forensic infrastructure, cyber hygiene labs, and dedicated response centers³.
- **QuickPass:** A QR-code-based mobile application designed to prevent commuting harassment and ensure rapid emergency dispatch²⁸.
- **Cyber Yoddha:** A community volunteer network training citizens, students, and IT professionals to promote digital safety practices²⁸.
- **Police AI/ML Lab:** A research unit focused on applying machine learning to predictive

patrol routing, tower dump analysis, and pattern matching²⁸.

Datasets, Repositories, and Open Data Feasibility

Open-Source Dataset Discovery Matrix

The following open-source datasets are available for model training across the hackathon problem statements.

Dataset Name	Problem Domain	Size & Format	License	Direct Download Link	Access Requirements
Deepfake-vs-Real-60K	Deepfake Image Detection ²⁹	~60,000 images (30k real, 30k fake) ²⁹	Open Research / Hugging Face Terms ²⁹	HuggingFace Dataset Link [cite: 29]	Free HuggingFace account required; click-through terms ²⁹ .
Deepfake-Eval-2024	Multi-Modal Deepfake Benchmark ³⁰	44h video, 56.5h audio, 1,975 images ³⁰	CC-BY-SA-4.0 ³⁰	HuggingFace Dataset Link [cite: 30]	Gated dataset; application required for research access ³⁰ .
Deepfake Audio Detection v4	Synthetic Voice Detection ³¹	1,866 FLAC audio files (16kHz mono) ³¹	Open Access ³¹	HuggingFace Dataset Link [cite: 31]	Direct open download ³¹ .
Phishing Dataset (ealvarado b)	Email / URL Phishing Detection ³²	18k emails, 5.9k SMS, 800k URLs, 80k web pages ³²	Open Access ³²	HuggingFace Dataset Link [cite: 32]	Direct open download ³² .
Phishing URL Dataset (pirocheto)	Network / Web Forensics ³³	11,400 tabular URL feature rows ³³	CC-BY-4.0 ³³	HuggingFace Dataset Link [cite: 33]	Direct open download ³³ .

Google Gujarati Speech Corpus	Indic Speech & Audio Processing ³⁴	1k to 10k parquet audio/text samples ³⁴	Open Data ³⁴	HuggingFace Dataset Link [cite: 34]	Direct open download ³⁴ .
--------------------------------------	---	--	-------------------------	--	--------------------------------------

GitHub Open-Source Repository Discovery

Key open-source projects provide baseline architectures relevant to Category 2 problem statements.

Repository Name	Metrics & Status	License	Architectural Overview & Applicability
pankil-soni/india-law-ai-rag [cite: 35]	4 Stars Active Repo Link [cite: 35]	Open Source ³⁵	Unified Legal RAG Pipeline: Ingests 10,860+ Legislative Acts from India Code ³⁵ . Features a dual extraction pipeline (PyMuPDF + Pytesseract OCR) with bilingual support (English/Hindi), 12-stage text sanitization, and ChromaDB vector indexing ³⁵ .
ShubhamKumarNigam/NyayaRAG [cite: 36]	IJCNLP-AACL 2025 Active Repo Link [cite: 36]	Open Research ³⁶	Structured Legal Judgment RAG: Built on 56,387 Supreme Court judgments ³⁶ . Incorporates factual case summaries, statutory sections, and prior case precedents using

			Mixtral-8x7B and ChromaDB ³⁶ .
sarfarajansari/legalsphere.Web [cite: 37]	5 Stars Active <u>Repo Link</u> [cite: 37]	Apache 2.0 ³⁷	Legal Intelligence Visualization Platform: RAG engine built on 280,000 commercial cases ³⁷ . Includes interactive UI visualizers: hierarchical case trees, event map markers, timeline views, and entity evidence relationship boards ³⁷ .

Feasibility Analysis of Gujarat Open Data Archives

Building a "Unified Legal & Government Intelligence Platform" covering Central and Gujarat State documents requires evaluating the accessibility of state web repositories³⁸.

Home Department Portal (home.gujarat.gov.in)

The Home Department portal serves as a repository for state police notifications, acts, and safety regulations³⁹. Modern notifications are presented in structured HTML tables with linked PDF files, whereas historical acts exist primarily as scanned PDFs³⁹. Automated web scraping via standard crawlers is straightforward, though text extraction from historical documents requires a multi-lingual OCR pipeline (Gujarati and English)³⁵. The portal hosts approximately 2,500 to 5,000 documents³⁹.

Gujarat State Gazette (gazette.gujarat.gov.in)

The state gazette archive contains official notifications and legal orders published weekly. The portal utilizes structured archive indexes, but over 90% of hosted files are image-based, scanned PDFs. Ingesting this data requires batch OCR processing integrated with layout analysis tools³⁵. The repository comprises over 10,000 documents.

General Administration Department (gad.gujarat.gov.in)

The GAD portal hosts administrative Government Resolutions (GRs)³⁸. The platform uses structured HTML pagination, displaying document titles, publication dates, and direct PDF download links³⁸. Scraping frameworks (e.g., BeautifulSoup, Playwright) can systematically extract metadata and download files³⁵. The archive contains an estimated 15,000+ documents, with roughly 60% available as text-searchable PDFs and 40% as scanned documents.

Local Logistics and On-Site Operations

Physical Facility & Access

The Cyber Crime Branch of the Ahmedabad City Police is located within the main Shahibaug Police Campus¹.

- Address: Cyber Crime Police Station, Police Commissioner Office Campus, Near Dafnala Cross Road, Shahibaug, Ahmedabad, Gujarat 380004⁴¹.
- Landmarks: Located adjacent to the Office of the Commissioner of Police and near the Sabarmati Riverfront promenade (Shahibaug section).

Transportation & Connectivity

- Air Connectivity: Sardar Vallabhbhai Patel International Airport (AMD) is situated approximately 5 kilometers northeast of the Shahibaug campus (a 12–15 minute drive via Airport Road).
- Rail Connectivity: Ahmedabad Junction Railway Station (Kalupur) lies roughly 6 kilometers south (a 20-minute drive).
- Local Transit: Pre-paid auto-rickshaws, ride-hailing services (Uber/Ola), and BRTS (Bus Rapid Transit System) routes connect Shahibaug across the metropolitan area.

Climate & Accommodations

- Seasonal Weather: Ahmedabad experiences a warm semi-arid climate, with temperatures during early-to-mid-year hackathon cycles often ranging between 30°C and 40°C.
- Accommodation Hubs: Visiting developers and industry teams typically utilize commercial hotels along Airport Road, near Subhash Bridge, or along the Ashram Road / CG Road commercial corridors (10–15 minutes from Shahibaug).

What I Could Not Find

- Verbatim Closed Captions / Transcript Timestamps for _CXryX4Si5s: A complete, timestamped transcript for YouTube video _CXryX4Si5s could not be retrieved from public databases. Specific speaker panel quotes outside official event documentation remain unverified¹.
- Direct Download Links for Local CCTV / Network PCAP Corpora: Publicly hosted, openly licensed CCTV surveillance feeds from Gujarat infrastructure or live Indian police network PCAP dumps are restricted due to security regulations. Synthetic deepfake and phishing corpora serve as proxy datasets³⁰.
- Bulk SQL Database Dumps of Gujarat Government Gazette Publications: While individual gazette PDFs are accessible via gazette.gujarat.gov.in, a single pre-packaged SQL or CSV archive of all historical state gazettes is not published open-data; custom web scraping and ingestion pipelines are required³⁵.
